## Profile

---

I am an energetic, ambitious person who has developed a mature and responsible approach to any task I undertake, or situation that I'm presented with. As an intern who worked for 3 months in developing a website I love working and learning from the team. Mostly codes in Python. Interested in developing web applications and automation programs. Dedicated towards work and a fast learner.

---

## Skills

- 
- Good knowledge of Object Oriented Programming
  - Python, C, C++
  - HTML, CSS, JavaScript
  - Django and Flask Web Framework
  - PostgreSQL
  - Data Visualization using Bokeh
  - Machine Learning using Tensorflow

---

## Education

---

### Himalaya College of Engineering/ Bachelors Degree

November 2015 - September 2019, Chyasal, Lalitpur

Studied computer engineering at Himalaya College of Engineering.

---

## Projects

---

### Portfolio Using Django Web Framework

The users can view basic information about the person as well as view the blogs and also download the resume uploaded by the admin.

### Blog Site

Built an blog site using Flask Framework. Users can create account and post a blog in this website. Also the users can update and edit blogs as well as see other people blog.

### Product Hunt Website

Users can upload their project ideas as well as view the project ideas of other users. Users can upvote the projects if they like it. Created using Django web framework.

### Sentiment Analysis using LSTM/RNN

Trained a neural network model which can classify sentiment of the reviews given by the users as positive or negative using LSTM algorithm. Also build a website using Django to rate products based on the reviews of the users. The users can also visualize data based on the reviews.

## **Android Ecommerce Site**

Built an ecommerce site in Android in which users can view products and add to cart. Used REST API to fetch the data from the server.

---

## **Work Experience**

- 
- **Internship in Python Django**  
Worked as an intern in **DJ Group of Company** (Koteshwor). Helped to build a Job portal website. Was assigned to work in an app. Completed the work and received a positive feedback on the work.

---

## **Interests**
